

# MAINTENANCE FREE BATTERIES

ELECTRICAL

**Patented Sealed Post**  
prevents acid seepage, reduces corrosion - extends battery life.

**Safety Valve Flame/Arrestor**  
relieves excess pressure.

**Thru-Partition Construction**  
provides shorter current path with less resistance than over the partition construction - you get more cranking power when you need it!

**Heat Sealed Case to Cover**  
protects against seepage and corrosion - bonded unit gives extra strength.

**Special Active Material**  
is compounded to withstand vibration, prolong battery life and dependability.

**Polypropylene Cover and Container**  
assures reserve electrolyte capacity for cooler operating temperatures; gives greater resistance to gas and oil - and impact in extreme weather conditions!

**Special Grid Design**  
withstands severe vibration, assures maximum conductivity.

**Special Separator**  
makes the battery spill-proof. Valve regulated design eliminates water loss and the need to refill with acid.

# MAINTENANCE FREE

## YUMICRON CX

### Calcium plate (CX) technology:

- Lower maintenance and more battery cranking power than conventional batteries.
- CX will generate **5% to 8% more cold cranking amperage** than our own high-output YuMicron lead antimony battery.
- Reduced water loss requires less service.
- CX holds its specific gravity more than three times as long as lead antimony type batteries resulting in a longer shelf life.

## YUMICRON

- **30% more starting power than conventional batteries.**
- For heavily accessorized machines or high compression engines with high cranking requirements.
- YuMicron's reserve power is a real bonus for easier starting!
