4" Internal Disc Slip-On

## SuperLight Stainless Series

**Don't let the word "light" fool you.** This is a big can of whoop-ass you can strap to your bike. Need proof? Our X1 Lightening slip-on cranked out almost 4% more horsepower than other stock systems without any modifications.

**SuperTrapp's patented disc design** lets you tune your bike for power and sound. Internal and external 4" disc systems are available depending on model.

**The looks aren't wimpy, either.** Corrosion-free stainless steel and a low-slung look say you mean business. And unlike other replacements, the SuperLight series won't block oil filter, drain plug or center stand access.

*You want a piece of this action?*
