

K&N Motocross / Dirt Bike MX XStream® Air Filters

With the current rage in 4-stroke technology, the K&N XStream Top Filter has become very popular for dirt bikes. The increased filtration area provides more air flow while the 4 layers of woven premium cotton media allow for increased filtration. These elements combine to offer optimum air flow for all performance Off-Road motorcycles.

- * XStream technology integrated into a two piece High-Flow Air Filter
- * Two piece design makes installation, changing and cleaning a breeze
- * Pleated cotton filter allows for 2-3 times the filtration area of a foam filter!
- * Large surface area for longer service intervals, less cleaning and more riding!
- * Pre-Oiled, ready for installation

Back Fire Protection

Epoxy-coated aluminum wire mesh, incorporated into a back-fire screen, protects the filter element while straightening air flow!

Larger Surface Area

Pleated cotton filters offer more surface area than foam.

Two-Piece Design

K&N's Xstream technology has been integrated into a two-piece High-Flow Air Filter. Two-piece design makes installation, changing & cleaning a breeze!

Pre-Oiled

All K&N Filters are pre-oiled and a race ready! (ReCharger Cleaning kits sold separately)

Higher Filtration

Four layers of woven, premium, cotton media provide outstanding filtration.

Perfect Seal

Each K&N Filter is designed with a Sealing Bead precise to its applications.
