

## SCS LOCK-ON GRIPS

Pro Grip's Speed Control System (SCS) offers an all-in-one grip solution. The SCS system replaces your stock throttle tube with a bonded carbon fiber tube and grip system. This eliminates the need for grip glue or safety wire. The left grip features a 100% slip proof Pyton Gripping System. This will be your first set of grips with identical exterior diameter. This system is great for quick, on-site grip replacements. If you want absolute confidence, this should be your primary grip. If you carry a spare set, these grips are a must!

### 700 ROAD SCS
