CLUTCH KITS FOR STREET & DIRT

## STREET - 2 choices

### 1. Standard - CK Series

Almost identical to original equipment clutch plates, the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

### 2. Race/Sport

SRC Kevlar Series  
A Kevlar paper lined plate set complete with heavy duty clutch springs, the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC Kevlar series are longer life and higher heat resistance. This clutch has a more aggressive/faster take up than the CK cork series.

## MOTO-X - 3 choices

### 1. Full Kit - DRC Series

EBC's number one selling product for motocross & sport use, the DRC kit includes heavy duty aluminum impregnated cork based plates, 10% upgrade clutch springs and steel intermediate driven plates. The steel intermediate plates outlast stock alloy units and prevent muddying of the oil & maintaining stack height longer. The slightly heavier weight gives an improved fly wheel effect on smaller engines. The CK series plates within the DRC set include the new "wide ear" construction lined plates which prevent "dogging" of the clutch basket; see sketch above.

### 2. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

### 3. Race - 'EP' Kevlar Series

Extra Plate kit with Kevlar lined friction plates, steel separator plates and heavy duty clutch springs. The EP kit is a heavy duty high temperature resistant clutch, suitable for sport/ race use in Moto-X and ATV applications. Each kit includes 1 extra friction & 1 extra steel plate for 10% more friction area. All plates are slightly thinner to retain stock stack height.

## EBC "EP" KITS

The STRONGEST off Road Clutches money can buy - in KEVLAR

EBC new "EP" KITS are built with US MADE Dupont Kevlar fiber friction plates - High Durability STEEL intermediate plates to prevent early wear and distortion BUT as a world FIRST we give you an Extra steel and Extra friction plate in every set. With Alloy drive fingers these plates won't "dog" your clutch basket plus with 10% more friction area you get better drive and the high heat resistance of KEVLAR facings. New Destressed drive plates reduce chance of fracture in toughest conditions. SELECT CORRECT SET No. FROM "DRC" SECTION AND ADD SUFFIX "EP".

### CSK Spring Kits

- Always fit new springs which get tired after miles of heat and use.
- EBC spring kits are 10% stiffer than standard and are sold in engine sets.
- As stated in general fitting/safety instructions, advise customers that lever will feel slightly 'heavier' when uprating springs, and to test ride/acquaint themselves with this change in control.

Standard OEM replacement clutches are cork based engine sets of friction plates only - SRC kits are engine sets of Kevlar fiber lined friction plates.
