

THE NEW DEFINITION OF SPECTACULAR:

SPECTRE

Aggressive styling is just the start for this incredible new Suomy motocross helmet. Pushing available technology to the limits, the all-new SPECTRE captures the very best of Suomy's latest innovations, all in an extremely lightweight package bursting with features and technology sure to please the mid- to high-end market segment.

Among the outstanding technology features found on this helmet is an advanced Dynamically Variable Resistance Crush Zone designed into the EPS. This unique technologically advanced EPS design allows both maximized energy management in the lateral and horizontal planes, but also allows unprecedented airflow from virtually the entire head area. Further advancements are found in the Vari-Flex visor that has the ability to take significant deflection without damage to the visor or the graphics on it. In addition, a fully integrated Ram Air duct located under the visor work in perfect harmony with the EPS system. The fully functional exhaust fin and integrated venting system round off this impressive off-road package.

The complete lists of features found on the SPECTRE are:

- Ultra-light weight
- 2 shell sizes to maximize fit
- DVRC™ (Dynamically Variable Resistance Crush Zone designed into the EPS)
- Veri-Flex Visor Peak
- Removeable washable 3D cheek pads with Ultralure
- Removeable washable Comfort liner with Ultralure
- Anti-slip goggle pads
- Aerodynamically functional exhaust fin
- Sound absorbing polymers
- S.E.C.™ (Structurally Enhanced Composite Fiber Weave)
- Hot cured bag molded construction
- Advanced channeled EPS for optimum venting
- Race approval by every major US motorcycle race organization
- DOT approved and CERTIFIED to BSI 6658 Type A: providing unprecedented pre-public release batch testing of each production run, providing exacting quality controls
- Available in Blue, Red, Yellow, Orange, Green.
- \$349.95 suggested retail
