

THE NEW DEFINITION OF EXTREME

Suomy is again pushing the boundaries with its 2004 introduction into the premium helmet market: the EXTREME is the high end version of the Suomy Spec-1R.

In addition to the standard Spec-1R features, the Extreme offers new technological advancements:

- Ultra Tech Face Shield: a translucent opalescent iridium finish with a special hydrophobic coating allows water to easily roll off the shield's surface. Anti-IR coating blocks heat and keeps riders face cool.
- Alcantara: luxurious chamois-like liner
- Ram air intake: closable design ducts air into the helmet body, pressurizing cool air into the unique waffled EPS channeled system.
- Air wedge top diffuser: extracts hot air and its aggressive design provides aerodynamic stability

As always, Suomy delivers the ultimate in graphics. There will be three replicas available in the EXTREME Spec-1R: the EXTREME Flower (shown on the left), the EXTREME Bostrom, and the EXTREME Biaggi. MSRP is \$649.95.
